investments made in money market investment instruments, bonds and shares. The share of the equity component in the mutual fund portfolio is managed actively as is its regional and sector structure. The neutral weight of the share of the equity component in the assets of the mutual fund is 30%, with the option of going up to +-10%. The fund's performance target is to surpass the yields of the Czech Republic long-term state bonds through a combination of investments into bonds and a share (30-40%) of equity component. The mutual fund carries a currency risk arising from investments made in local currencies. This risk in case of the equity component is actively managed by the available hedge instruments. The credit and interest risk is also actively managed. The recommended investment horizon is 4 years and more.
