## Payment notes

**How does the Prémiový dluhový cenný papír 3.6% EURO STOXX 50® Deep Barrier 10 work?**

- The return of the nominal value of the Premium Bond at its maturity date is based on the market rate trend of the main European EURO STOXX 50® stock index.
- The initial value (see Note) of the EURO STOXX 50® index shall be fixed on 21 March 2019.
- The EURO STOXX 50® index trend shall be observed from 22 March 2019 to 21 March 2024 (daily closing price).
- The yield of 3.6% p.a. of the nominal value of the Premium Bond is being paid out annually and is paid always which means regardless of the trend of the underlying asset of the EURO STOXX 50® stock index.
- The barrier level is set at 49% of the fixed initial value (see Note) of the EURO STOXX 50® index, touching the barrier is not considered breaking it.
- Automatic early repayment for the duration of the Premium Bond may arise once a year if the value of the underlying index at the relevant date of observation equals or is above the current valid barrier for early repayment.
- If the condition for automatic early repayment is not met, the investor shall receive a yield of 3.6% of its nominal value and the Premium Bond continues to the next date of possible early repayment.
- If the Premium Bond is repaid early, the investor shall receive 100% of its nominal value and a yield of 3.6% p.a. of its nominal value.  
**See the example in the leaflet**
- If there is no automatic early repayment and during observation the value of EURO STOXX 50® index (daily closing price) never falls below the barrier of 49% of its fixed initial value (see Note), 100% of the Premium Bond nominal value shall be paid out at the maturity date in which case the fixed yield of 3.6% of its nominal value is paid out annually.
- If there is no automatic early repayment and during observation the value of EURO STOXX 50® index (daily closing price) falls below the barrier of 49% of its fixed initial value (see Note) however at the last observation date it increases to or is above of 85% of its fixed initial value (see Note) then 100% of the Premium Bond nominal value shall be paid out at the maturity date in which case the fixed yield of 3.6% p.a. of its nominal value shall be paid annually.  
**See the example in the leaflet**
- If there is no automatic early repayment and during the observation the value of the EURO STOXX 50® stock index falls (daily closing price) below the barrier of 49% of its fixed initial value (see Note) and is below 85% of its fixed initial value on the last observation day (see Note), then at the maturity date the nominal value of the Premium Bond is paid out decreased by the total percentage loss of the EURO

STOXX 50® stock index as of the date of fixing the initial value (21 March 2019)&
