Premium deposits FX | Description

Premium deposits are the right products to deposit funds that are free for a limited period of time. The premium of the currency premium deposit depends on the development of the determined currency pair. Interest is applied every day at a higher or lower rate depending on whether the exchange rate is inside or outside the determined range. The range is changed for every month pursuant to the last rate in the previous month. The total deposit yield is a sum of yields for all days of the premium period.

Description Yield Calculation

Interest at a rate of 1,00% or 2,30% p. a. is paid on the premium deposit every day. The higher interest rate will be applied if the USD/EUR exchange rate as announced by CNB for the respective day is inside the determined range (including limiting values). Thus the resulting deposit yield will be a sum of the yields for individual interest days. The first determining range will be set pursuant to the exchange rate as announced by CNB on 30/08/2019. The limit of the determining range will be 10 cents (USD) below the rate. The yield depends on the development of the USD/EUR exchange rate as announced by CNB for every day. The higher yield falls on the day that dollar becomes stronger in the determined range in comparison with its rate at the beginning of the month. The determining range for the determination of the premium will be set monthly pursuant to the current value of the exchange rate, in the range from USD 0 to 0.10. Principal and yield payout from 31/08/2020.
