## Description

**PDCP ENERGY TRANSITION AUTOCALL with the option of automatic early**

**repayment provides the opportunity to gain an attractive annual yield of 7% (see Note). The total yield for its four-year duration can then reach up to 28%.**

The payout of the yield and the nominal value of PDCP ENERGY TRANSITION AUTOCALL is based on the trend of Solactive Energy Transition 2021 AR 5% stock index which comprises ten important companies operating in the sector of energy from renewable sources. In addition, the construction of PDCP ENERGY TRANSITION AUTOCALL allows its early repayment even in case of a slight decrease or stagnation of the underlying index. PDCP ENERGY TRANSITION AUTOCALL may end already after the first year or subsequently each year for its duration depending on fulfilment of conditions for early repayment or at its maturity date.

**For more information see the leaflet**

### Payment notes

#### How does PDCP ENERGY TRANSITION AUTOCALL work?

- The payout of the yield and nominal value of PDCP ENERGY TRANSITION AUTOCALL depends on the market rate trend of Solactive Energy Transition 2021 AR 5% stock index.
- For its duration PDCP ENERGY TRANSITION AUTOCALL can be automatically paid out early once a year, if the value of the underlying index at the observation date will be equal or higher than the comparative value of the index at the relevant observation date.
- If the automatic early repayment condition is not met, PDCP ENERGY TRANSITION AUTOCALL continues to the next date of possible repayment. If PDCP ENERGY TRANSITION AUTOCALL is automatically paid out early, the investor shall receive its nominal value and a yield of 7% for each year that elapsed since the issue date.
- If the automatic early repayment is not made and at the date of fixing the closing value of the observed index it does not fall below the 60% barrier of its initial value, 100% of the PDCP ENERGY TRANSITION AUTOCALL + the total yield of  $4 \times 7\% = 28\%$  (see Note) shall be paid at the maturity date.
- If the automatic early repayment is not made and at the date of fixing the closing value of the monitored index it falls below the 60% barrier of its initial value, 100% of the nominal value of PDCP ENERGY TRANSITION AUTOCALL decreased by the loss of the index incurred since the date of fixing its initial value until the date of fixing its closing value shall be paid out at its maturity date. The investor shall lose more than 40% of his investment and the yield shall not be paid out.

**You will find the examples in the leaflet**

### Settlement

- Maturity shall be on 27 May 2025
- The disbursement of the yield and nominal value shall be conducted by Česká spořitelna
- It takes three working days to settle the buying and selling of the Premium Bond

### Secondary market

- Minimum purchased amount: 1 piece
- Price for the provision of early redemption: 2% of the transaction volume

- Price at subscription: 100%, without a fee
- Liquidity: daily according to current market prices published in the Exchange Rate List of Česká spořitelna, a.s.

-----  
Note: PDCP ENERGY TRANSITION AUTOCALL pays out potential yields in a lump sum at its early or regular maturity date, the consolidated interest is not claimed.

Note 2: The initial value will be calculated by the Solactive Energy Transition 2021 Index AR 5% provider based on the closing prices of the underlying assets on 20 May 2021.

Note 3: Product risk weight is on a scale of 1 to 7 from a potentially lower risk and yield of 1 to a potentially higher risk and yield of 7, assuming that you will keep the product until its maturity date. The real risk may significantly differ in case you sell the product prematurely. The product risk weight is a guide for a comparison of the risk rate of this product compared with the other. It shows how likely it is that you can lose money as a consequence of movements on the markets, or because the issuer will be unable to pay out the money.

#### Disclaimer

In the period before maturity, the bond price can fluctuate above and below the bond face value depending on the development of the interest rate and underlying asset. A bond can be sold even before the maturity date, for the price pursuant to the pricelist of the issuer.
