Advantages

Investment in a concentrated portfolio of small and mid sized value stocks. Diversification of risks over several countries and industries. Opportunities for attractive value increase.

Details you should be aware of

The price of the funds can fluctuate considerably (high volatility). Due to the investment in foreign currencies, the fund value can fluctuate due to changes in the exchange rate. Capital loss is possible. Since the feeder fund predominantly invests in the master fund, the performance of the feeder fund depends significantly on the performance of the master fund. Other risks that may be of significance for the feeder fund are, in particular, credit and counterparty risk, liquidity risk, custody risk, derivative risk and operational risk. Comprehensive information on the risks of the feeder fund can be found in the

Performance goal and investment strategy

The ERSTE STOCK VALUE (CZK) serves as a feeder fund for the ERSTE STOCK VALUE fund (master fund). Foreign exchange risks of the master fund are hedged within the feeder fund against the Czech crown. The master fund is an equity fund which invests in selected companies worldwide. The fund's investment process is based on a quantitative pre-selection as well as an analysis of hereby identified companies according to fundamental and technical aspects. The stock selection is conducted with focus on value companies with a small or mid sized market capitalization. A concentrated portfolio is striven for as part of the portfolio construction process. Ecological and social factors as well as corporate management factors are integrated into the investment process.
