 Advantages

Broad diversification in selected Turkish companies with little capital investment. Active stock selection based on fundamental criteria. Opportunities for attractive capital appreciation for investors with large risk appetite. The fund is suitable as an addition to an existing equity portfolio and is intended for long-term capital appreciation.

 Details you should be aware of

The price of the funds can fluctuate considerably (high volatility). Due to the investment in foreign currencies, especially in Turkish lira, the net asset value can fluctuate due to changes in the exchange rate. Capital loss is possible. Risks that may be significant for the fund are in particular: credit and counterparty risk, liquidity risk, custody risk, derivative risk and operational risk. Comprehensive information on the risks of the fund can be found in the prospectus or the information for investors pursuant to § 21 AIFMG, section II, "Risk information".

### Performance goal and investment strategy

The ERSTE STOCK ISTANBUL mainly invests in companies based or stock market listed in Turkey. The fund's investment process is based on fundamental business analysis. When selecting stocks, the focus is on high-quality, high-growth companies. A hedge against the foreign currency risk from the Turkish lira is generally not provided, but is possible.
