 Advantages	 Details you should be aware of
Broadly diversified investment in companies of Central and Eastern European emerging markets with little capital investment. Opportunities for capital appreciation. The fund is suitable as an addition to an existing equity portfolio and is intended for long-term capital appreciation.	The price of the funds can fluctuate considerably (high volatility). Due to the investment in foreign currencies, the net asset value in Euro can fluctuate due to changes in the exchange rate. Capital loss is possible. Risks that may be significant for the fund are in particular: credit and counterparty risk, liquidity risk, custody risk, derivative risk and operational risk. Comprehensive information on the risks of the fund can be found in the prospectus or the information for investors pursuant to § 21 AIFMG, section II, "Risk information".

Performance goal and investment strategy

ERSTE STOCK EUROPE EMERGING invests primarily in companies domiciled or with business interests in Central, Southern and Eastern European countries (including Turkey) excluding Russia. The Fund's investment process is based on fundamental company analysis. Names are selected from among companies that meet high quality standards and post strong growth rates. Foreign currency risks are generally not hedged, but hedging is possible.

Information about the segregation of the illiquid, non-fungible portion of the Fund as of 7 October 2022 due to the current political situation and the associated uncertainties regarding the fungibility of the Moscow Exchange can be found [here](#)

Performance (2024/09/30)

	-9.07	

Upozornění na riziko podle rakouského zákona o investičních fondech 2011

Since the history of the fund is very short, this performance chart is of little significance.

ERSTE STOCK EUROPE EMERGING may exhibit increased volatility due to the composition of its portfolio: i.e. the unit value can be subject to significant fluctuations both upwards and downwards within short periods of time.
