Performance goal and investment strategy

The ERSTE STOCK GLOBAL invests in selected companies worldwide. The fund's investment process is based on fundamental business analysis. The selection of stocks takes place with a focus on high-quality growth companies without restrictions on size, industry affiliation and location. A concentrated portfolio is striven for as part of the portfolio construction process. Furthermore, the individual stocks are weighted independently of the market capitalization of the respective companies. A hedge against foreign currency risks is generally not provided, but is possible. Ecological and social factors as well as corporate management factors are integrated into the investment process.
