- Maturity date: 14 January 2025
- Price for the provision of early redemption: 2% of the transaction volume
- Issuer: Erste Group Bank AG
- Selling price: as per the current rates of Česká spořitelna

Description

Do you trust the financial strength of the Erste Group Bank and would you like to be part of the success of this renowned Central European financial group? The EGB 2,90%/2025 Subordinated Bond with attractive fixed interest-bearing offers an interesting yield potential.

In the current market environment of low interest rates, the EGB 2,90%/2025 Subordinated Bond offers an above-standard fixed coupon of 2,90% per year for the period of 9 years.

What does “Subordinated” mean?

In case of liquidation or insolvency of the issuer, in this case the Erste Group Bank AG, any unsubordinated liabilities (such as mortgage bonds and senior bonds) would be first covered, and only then the funds of investors holding subordinated bonds would be paid out. With a view to this risk, subordinated bonds offer a higher yield as a reward.

Payment notes

- The fixed interest rate of 2,90 % p.a. shall be applied to the bond.

Settlement

- The maturity date of the bond shall be 14 January 2025.
- The disbursement of the yield as well as the nominal value shall be conducted by Česká spořitelna.
- The bond purchase as well as sale settlement takes 3 business days.

Secondary market

- Minimum purchased quantity: 1 piece.
- The bond may be sold also prior to its maturity date for the price specified by the current exchange rates table.

As of 1 August 2013 with the provision of state aid the principles are enforced as contained in the Communication from the Commission on the application of state aid rules to support measures in favour of banks in the context of the financial crisis (2013/C 216/01). According to these principles prior to the provision of aid for restructuring in any form, whether for the recapitalisation or rescue of impaired bank assets, all measures are to be taken for capital formation, including conversion of subordinated debts into equity. For subordinated debt holders these rules entail that they must contribute to reducing the capital shortfall, so their contributions can take the form of either a conversion of a bond to a share or a full write-down of their principal.

Disclaimer

In the period before maturity, the bond price can fluctuate above and below the bond face value depending on the development of the interest rate and underlying asset. A bond can be sold even before the maturity date, for the price pursuant to the pricelist of the issuer.
