Turbo long/short | Description

Turbo long/short allow you to benefit from market fluctuations in both ways. Turbo Long benefit from rising prices, Turbo Short from falling ones. Every incremental movement in the price of the underlying may lead to disproportionately high returns due to the leverage effect. However, while the unlimited upward potential is the upside of this particular Turbo , the risk of losing the entire capital invested if the set barrier has been broken is its downside.

based on the most recently delivered price of the underlying (see date/time stamp in tab underlying).

In the case of Turbo Long the barrier is set below the current price of the underlying. Turbo Short will have the barrier set above the current price of the underlying. There are Turbo long/short with and without expiry date.

There is no entitlement to dividends from the underlying instrument.

Notice on chart of future underlyings

The chart displays the performance of the future currently serving as underlying. The underlying changes monthly or quarterly, as shortly before the future expires there is a roll-over in the next due future. Therefore, the price history in the chart solely represents the current future underlying.
