Then in the next nine years until repayment its yield shall be based on the six-month PRIBOR rate while the minimum interest shall be 1% p.a. and the bond will pay out a maximum of 4% p.a.

### Payment notes

#### How the yield is calculated?

- In the first year the fixed interest rate of 1.5% p.a. shall be applied to the bond.
- In the following years, a floating interest rate shall be applied to the bond which shall be determined every half a year on the basis of the current six-month PRIBOR interbank interest rate and shall range from the minimum of 1% p.a. to the maximum of 4% p.a.
- If the six-month PRIBOR is fixed in the range from 1% to 4% including these values, the investor shall receive an interest in the amount corresponding to this specific value.
- If the six-month PRIBOR is fixed under 1% (e.g. 0.7) the investor shall receive an interest in the amount of 1% p.a.
- If the six-month PRIBOR is fixed above 4% (e.g. 5.5%), the investor shall receive an interest in the amount of 4% p.a.
- The interest shall be disbursed on a six-month basis.
