Advantages

Investment in selected bonds of sustainable (ethical) issuers. An ethics advisory board regularly reviews sustainability. Gains are possible when interest rates fall.

Details you should be aware of

Rising interest rates can quickly lead to price declines. The investor bears the issuer risk of the participating companies. A change in the credit rating of individual companies and countries can have an effect on the net asset value of the fund (losses). Loss of capital is possible. Since the feeder fund predominantly invests in the master fund, the performance of the feeder fund depends significantly on the performance of the master fund. Other risks that may be of significance for the feeder fund are, in particular, credit and counterparty risk, liquidity risk, custody risk, derivative risk and operational risk. Comprehensive information

on the risks of the feeder fund can be found in the prospectus or the information for investors pursuant to § 21 AIFMG, section II, "Risk information".

Performance goal and investment strategy

The ERSTE RESPONSIBLE BOND (CZK) serves as a feeder fund for the ERSTE RESPONSIBLE BOND fund (master fund). Foreign exchange risks of the master fund are hedged within the feeder fund against the Czech crown. The master fund is a euro bond fund whose investment universe is based on ethically sustainable criteria. The fund invests primarily in government bonds, government-related and supranational issuers, corporate bonds, bonds from financial service providers, "Pfandbriefe" and special sustainable bond issues. Investments in bonds of companies and countries, that are pioneers in terms of ecological, social and governance aspects. This also takes into account ethical aspects (holistic ESG approach).
