Advantages

Investment in a concentrated portfolio of small and mid sized value stocks. Diversification of risks over several countries and industries. Opportunities for attractive value increase.

Details you should be aware of

The price of the funds can fluctuate greatly (high volatility). The investor mainly bears the risk of the global equity markets as well as the issuer risk of the participating companies. Due to the investment in foreign currencies, the net asset value can fluctuate due to changes in the exchange rate. Loss of capital is possible.

Performance goal and investment strategy

The ERSTE STOCK VALUE (CZK) serves as a feeder fund for the ERSTE STOCK VALUE fund (master fund). Foreign exchange risks of the master fund are hedged within the feeder fund against the Czech crown. The master fund is an equity fund which invests in selected companies worldwide. The fund's investment process is based on a quantitative pre-selection as well as an analysis of hereby identified companies according to fundamental and technical aspects. The stock selection is conducted with focus on value companies with a small or

mid sized market capitalization. A concentrated portfolio is striven for as part of the portfolio construction process. Furthermore, the individual stocks are equally weighted independently of the market capitalization of the respective companies. Ecological and social factors as well as corporate management factors are integrated into the investment process.

Upozornění na riziko podle rakouského zákona o investičních fondech 2011

Unless explicitly noted otherwise, performance figures for periods of less than five years always start from the launch of the fund. Performance figures for periods of less than 12 months in particular are not indicative of a fund's development due to their short-term nature.

The Investment Fund will permanently invest at least 85% of its assets in shares of ERSTE STOCK VALUE (master fund).
