Advantages

- Your return potential is disproportionately high due to low capital investment and the leverage effect.
- You can participate in rising prices.
- The influence of time value and volatility is very low.

Disadvantages

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market!

The target market defines the set of investors (retail clients) for whom the investment product is intended.

This investment product is intended for investors who:

The calculation of the key figures is based on the most recently delivered price of the underlying (see date/time stamp in tab underlying).

- have sufficient knowledge and/or experience regarding structured products and shares.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes.
- In the event of an unfavorable development of the investment, they are able to bear loss up to the amount corresponding to the product's risk indicator specified in General attributes.
- Are interested in holding the product until the maturity specified in General attributes.

- You may lose your entire investment.
- The leverage effect may cause disproportionately high losses.
- If this product is not secured against a currency risk, the performance of the product is affected by the positive or negative trend of the exchange rate between the product's currency (CZK) and the currency in which the underlying asset is traded. If CZK strengthens, the price falls and if CZK weakens the price rises.

Turbo long/short | Description

Turbo long/short allow you to benefit from market fluctuations in both ways. Turbo Long benefit from rising prices, Turbo Short from falling ones. Every incremental movement in the price of the underlying may lead to disproportionately high returns due to the leverage effect. However, while the unlimited upward potential is the upside of this particular Turbo , the risk of losing the entire capital invested if the set barrier has been broken is its downside.

In the case of Turbo Long the barrier is set below the current price of the underlying. Turbo Short will have the barrier set above the current price of the underlying. There are Turbo long/short with and without expiry date.

Secondary market

During the term it is possible to sell the product during the trading hours at the exchanges, where the product is listed.

The settlement at maturity of the certificate will realize within 7 working days. The settlement at knock-out of the certificate will realize within 7 working days.

Notice on chart of future underlyings

The chart displays the performance of the future currently serving as underlying. The underlying changes monthly or quarterly, as shortly before the future expires there is a roll-over in the next due future. Therefore, the price history in the chart solely represents the current future underlying.
