+ Advantages

- The fund optimally distributes the assets in many titles, which significantly reduces market risks.
- Professional fund management – experienced portfolio manager looks for the best investment opportunities on the market, with the background of analysts from the strong financial group - Erste Asset Management.
- Actively managed currency hedging.
- For regular investments, a discount on the fee for the purchase of share certificates.
- Fast availability of funds (usually within a week).

! Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes.
- In the event of an unfavorable development of the investment, they are

able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

• The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Risks that may be significant for the fund are mainly: market risk of changes in the value of securities, interest rate risk, credit risk, currency risk and liquidity risk. Full information on the fund's risks can be found in the prospectus or in the Key information document (KID). • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors. • Index table: www.erste-am.cz/tabulkaindexu. Performance goal and investment strategy

The fund's objective is to outperform Czech medium-term government bond yields in the long term. This is an open-ended mutual bond fund with a medium-term recommended period of investment. The key source of the fund's income is mainly interest yields from debt instruments. The fund mainly buys medium and long-term government bonds and partly also high quality corporate bonds at investment level. The fund is managed actively, and the fund manager can also make use of short-term market opportunities and thus flexibly manage the interest risk. The fund is suitable for investors who do not want to invest in stocks, but the yields of money funds or term deposits are insufficient for them.
