+ Advantages

- The fund optimally distributes the assets in many titles, which significantly reduces market risks.
- Professional fund management – experienced portfolio manager looks for the best investment opportunities on the market, with the background of analysts from the strong financial group - Erste Asset Management.
- Actively managed currency hedging.
- For regular investments, a discount on the fee for the purchase of share certificates.
- Fast availability of funds (usually within a week)

! Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes.
- In the event of an unfavorable development of the investment, they are

able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

• The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Risks that may be significant for the fund are mainly: market risk of changes in the value of securities, interest rate risk, credit risk, currency risk and liquidity risk. Full information on the fund's risks can be found in the prospectus or in the Key information document (KID). • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors. • Index table: www.erste-am.cz/tabulkaindexu. Performance goal and investment strategy

An equity fund intended mainly for dynamic investors with a long-term investment horizon. The fund's performance objective is to outperform the yields of global stock markets in the long term by investments in individual equity titles mainly from Central and additionally from Eastern Europe. It is suitable for those investors who believe in a positive development on stock markets of new EU member and candidate countries in the Central European and Eastern European region. The fund's investment policy works with the potential of the more dynamic growth of developing economies as opposed to developed economies and the fund manager tries to find investment opportunities across all economic sectors of the entire region. In view of the investment strategy, the fund is suitable for regular investment and of being part of the equity component of the investment portfolio.
