Advantages

- The presence of corporate bonds increases the long-term growth potential
- Addition to the bond part of the investment portfolio
- Thanks to hedging, the fund is not affected by currency risk
- The fund is actively managed
- 0% exit fees
- Ideal for regular investments

Details you should be aware of

- Growing interests may result in a short-term decline in price
- The currency risk is not fully hedged
- The fund is actively managed, i.e. its turnover can be high
- Money is normally available within a week
- Minimum investment CZK 300

Performance goal and investment strategy

The performance objective of the fund is to exceed the yields on government bonds of the Czech Republic through investments in bonds of neighbouring countries in the long term. It is an open bond share fund with a medium-term recommended investment period. The fund is ideal for investors who look for a higher yield than as offered by domestic bond funds. The fund endeavours to achieve surplus yield thanks to ongoing convergence of interest rates of Central European markets and the EU Economic and Monetary Union. The fund is actively managed,

which means that the fund manager can use short-term market opportunities as well. Significant sources of the fund income are mainly interest yields on debt instruments. The fund buys mainly government bonds of candidate and member countries of the European Union. The fund is partially currency hedged, and investment in the fund is connected with interest and currency risks.
