Advantages

- Clients do not have to worry about the management of their fund portfolio• It is intended for clients who would like to get a long-term and comprehensive solution of their investment portfolio by simple investment in one product• Money is usually available within a week

Details you should be aware of

- Due to the investment nature, the value of an investment certificate can fluctuate during the investment tenure. • A broad portfolio diversification reduces risk • Credit risk, risk of interest and the currency hedging is actively managed • Investment certificates are bought at the current price on the business day following the day that money was credited to the fund account • Investment certificates are normally bought on the second business day after an order to sell was given, and always at the current value as of the day that the order to sell was given.

Performance goal and investment strategy

The performance objective of the fund is to exceed the yields on the bonds of the Czech Republic through combined investments in bonds and stocks in the long term. It is a mixed share fund with the status of a funds fund. It is intended for experienced dynamic investors with a long-term investment horizon who are willing to accept possible fluctuations of the performance during the investment tenure. The goal of the investment policy is to provide long-term appreciation of investment certificates, particularly by investments in securities of money market funds, bond funds of collective investment and stock funds of collective investment. If stocks are not doing well, the portfolio manager may decrease their share in part and thus reduce the risk that the portfolio value may fall. The neutral weight of the share of the stock part in the fund assets is 50%.
