+ Advantages

- The fund optimally distributes the assets in many titles, which significantly reduces market risks.
- Professional fund management – experienced portfolio manager looks for the best investment opportunities on the market, with the background of analysts from the strong financial group - Erste Asset Management.
- Actively managed currency hedging.
- For regular investments, a discount on the fee for the purchase of share certificates.
- Fast availability of funds (usually within a week).

! Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes.
- In the event of an unfavorable development of the investment, they are

able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

• The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Risks that may be significant for the fund are mainly: market risk of changes in the value of securities, interest rate risk, credit risk, currency risk and liquidity risk. Full information on the fund's risks can be found in the prospectus or in the Key information document (KID). • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors. • Index table: www.erste-am.cz/tabulkaindexu

Performance goal and investment strategy

An equity fund intended for dynamic investors with a long-term investment horizon looking for attractive investment stories. The aim of the fund's investment strategy is to provide investors a long-term return by investments in a concentrated portfolio of stocks listed on mature stock markets. The objective is achieved by an active selection of individual stocks for a long-term return (so-called "stock picking"). The share of stocks and financial instruments bearing the risk of stock markets in the fund's portfolio can fluctuate from 80% to 100%. The fund's portfolio usually represents 25 different investment cases whose weight is usually approximately equal. Given the significant representation of stocks in the portfolio and high concentration of the portfolio, the value of the investments may show high short-term volatility. In view of the investment strategy, the fund is suitable for regular investment and of being part of the equity component of the investment portfolio.
