Advantages

- A simple solution: one fund, one investment, a comprehensive investment portfolio
- Professional active fund management - an experienced team of portfolio managers who search the market for the best investment opportunities and solutions
- Actively managed currency hedging
- For regular investments, a discount on the fee for the purchase of share certificates
- Fast availability of funds (usually within a week)
- The fund can be a complementary alternative to pension insurance.

Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes.
- In the event of an unfavorable development of the investment, they are

able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

• • The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Risks that may be significant for the fund are mainly: market risk of changes in the value of securities, interest rate risk, equity risk, credit risk, currency risk and liquidity risk. Full information on the fund's risks can be found in the prospectus or in the Key information document (KID) • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors.

Performance goal and investment strategy

The fund's performance objective is to outperform Czech government bond yields in the long term by a combination of investments in bonds and equities. This is an open-ended mutual fund with an optimised investment strategy, which is adapted to a long-term investment horizon. It is suitable for investors who plan to use their assets in around 2030. This strategy uses the growth potential of equity markets, which can achieve an attractive yield. Thanks to life cycle funds, the investor can secure his future financial needs, perhaps in case of retirement. The fund adjusts the composition of a portfolio with the fund's end date approaching in 2030. At the start of the fund investments are made in more dynamic assets – stocks which historically bring higher yields in the long term. During the life of the fund with the approaching so-called target date (such as expected retirement) assets will gradually be allocated more conservatively. At the end of the investment period, the fund only invests in the most conservative assets – exclusively in money market instruments.
