#### + Advantages

- A simple solution: one fund, one investment, a comprehensive investment portfolio.
- Professional active fund management - an experienced team of portfolio managers who search the market for the best investment opportunities and solutions.
- Actively managed currency hedging.
- For regular investments, a discount on the fee for the purchase of share certificates.
- Fast availability of funds (usually within a week).

#### ! Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit by investments that

consider aspects of sustainable investing (according to Article 8 or Article 9 SFDR) • are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General attributes. • In the event of an unfavorable development of the investment, they are able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

- The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Investors should be aware of sustainability risks - environmental, social and governance risks.
- Risks that may be significant for the fund are mainly: market risk of changes in the value of securities, interest rate risk, equity risk, credit risk, currency risk and liquidity risk. Full information on the fund's risks can be found in the prospectus or in the Key information document (KID). • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors.

### Performance goal and investment strategy

Mixed fund ESG Mix 50 – responsible investment is a comprehensive investment portfolio, which actively takes into account sustainable economic development and environmental protection, social principles and the principles of sustainable management. So the fund's portfolio manager actively looks for attractive and long-term stable investment opportunities in securities of issuers that take into account social, ethical and environmental aspects. The fund optimally allocates assets among several classes of assets and is suitable for experienced and yield-oriented investors who look for a higher return through investment in one fund in a long-term investment horizon. However, they are willing to accept any increased volatility of the value of their investments for its duration. The share of dynamic assets – stocks in the fund which fluctuates around 50% in the long term, offers very interesting room for a return. The conservative part, which consists mainly of a broad spectrum of bonds, adds to the fund's stability and provides the portfolio with weighted risk. This investment can offer an attractive return while maintaining the recommended investment horizon.
