### Advantages

- Comprehensive investment solution: one fund, one investment, a broadly diversified portfolio into multiple asset classes.
- Professional active fund management – experienced team of portfolio managers who search the market for the best investment opportunities and solutions.
- Active portfolio management allows to react flexibly to market developments and adjust the weights of risky assets in the portfolio.
- Actively managed currency hedging.
- Fast availability of funds (usually within a week).

### Details you should be aware of

Please note that the target market of this investment instrument is listed below. If you do not meet any of the listed parameters, you may be outside the specified target market! The target market defines the set of investors (retail clients) for whom the investment product is intended. This investment product is intended for investors who:

- have sufficient knowledge and/or experience regarding mutual funds.
- seek investment profit
- are able to accept a level of risk that is in accordance with the risk indicator of the product specified in General

attributes. • In the event of an unfavorable development of the investment, they are able to bear the possible loss, which is illustrated by performance scenarios, see Key Information Document (KID). • are interested in investing within the recommended investment period specified in General attributes. • This fund is not intended for investors (negative product target market) who are unable to bear the possible loss of invested funds in the event of an unfavorable development of the investment. • The client's compatibility with the product's target market will be evaluated during the purchase process.

• The value of the share certificate may fluctuate significantly during the investment duration, and therefore the return of the originally invested amount is not guaranteed. • Be aware of the risk of inflation. Investors should be aware that the fair value of the investment, including any real yield, may fall with regard to how the inflation reduces its value. • Risks that may be significant for the fund are for instance: market risk of changes in the value of securities, interest rate risk, equity risk, credit risk, currency risk, risk of alternative and real estate investments and liquidity risk. Complete information on the fund's risks can be found in the prospectus or in the Key information document (KID). • Investors should not base their investment decision solely on the information provided here as they may fall outside the target market or in a negative target market of this product and this product may not be suitable for all investors.

### Performance goal and investment strategy

Modelový privátní fond MPF 10 is an exclusive product in the investment offer of Erste Private Banking, which combines the benefits of classic open-ended mutual funds and individual asset management with a high standard of post-sale services. The fund's investment strategy relies mainly on the interest component which determines its low risk factor. The neutral weighted equity component is 10%. Thanks to the asset management, it is possible to partly regulate this neutral weighted equity component depending on market development. The fund uses the investment strategy of active "stock picking" and the actual fulfilment of the equity component is realised by direct positions in stocks of companies listed mainly on US and European markets. The fund also directly collects all dividends which are reinvested. The yield potential is supplemented by 10% of the share of further classes of assets such as alternative investments. Credit, interest and currency risk is managed actively. The objective of the strategy is to outperform Czech medium-term government bond yields.
