Description Yield Calculation

The yield depends on the development of the CZK/EUR exchange rate announced for each day by the CNB.

The deposit bears daily interest by a basic (lower) or premium (higher) interest rate.

Interest bearing by the basic or premium rate depends on whether the observed rate is outside or within the decisive band. This is determined for each individual month as a deviation in hellers from the fixed CZK/EUR exchange rate of the last working day in the given month and applies to the following month. If the rate is not announced by the CNB on the given day, the last known announced rate will be used to determine the band.

The premium (higher) interest rate is used in case that the CZK/EUR exchange rate announced by the CNB for the given day will be within the fixed decisive band, including the extreme values.

The basic (lower) interest rate is used in case that the CZK/EUR exchange rate announced by the CNB for the given day will be outside the set decisive band.
