- For the duration of PDCP U.S. BANKS AUTOCALL 2 it can be automatically repaid early once a year, if at the observation date the value of each individual underlying share will be equal or higher than the comparable value of the underlying share at the relevant observation date.
- If the automatic early repayment condition is not met, PDCP U.S. BANKS AUTOCALL 2 continues to the next possible repayment date.

- If there is no automatic early repayment and at the date of fixing the closing value of individual underlying shares the price of at least one underlying share falls below the barrier of 55% of its initial value, and at the same time the closing value of any of the remaining shares will not be equal or higher than 100% of its initial value, the payout of the nominal value PDCP U.S. BANKS AUTOCALL 2 at the maturity date will be reduced by the loss of the worst of the three shares since the date of fixing its initial value until the date of fixing its closing value.
